

Getting videos onto the computer

Monday April 4, 2022

You will probably be using a cell phone camera to film videos. You will be using a laptop to edit the videos. So, how do you get the photos from the phone to the laptop?

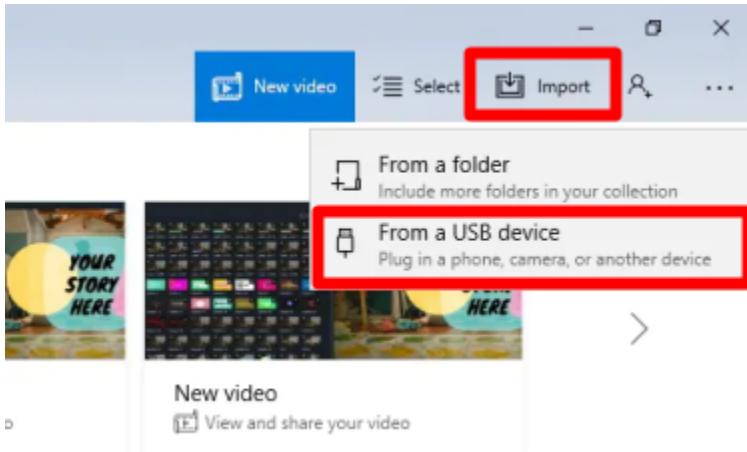

1. **Connect** your phone to the laptop using a USB cable

2. Turn your **phone on** and unlock it. Your PC can't find the device if the device is locked.
3. On your PC, select the **Start button** and then select **Photos** to open the Photos app.

4. Select **Import > From a connected device**, then follow the instructions. You can pick the items you want to import and select where to save them. Allow a few moments for detection and transfer.

5. **Select** the photos and videos you wish to import then click **Import**.

Starting a new video project

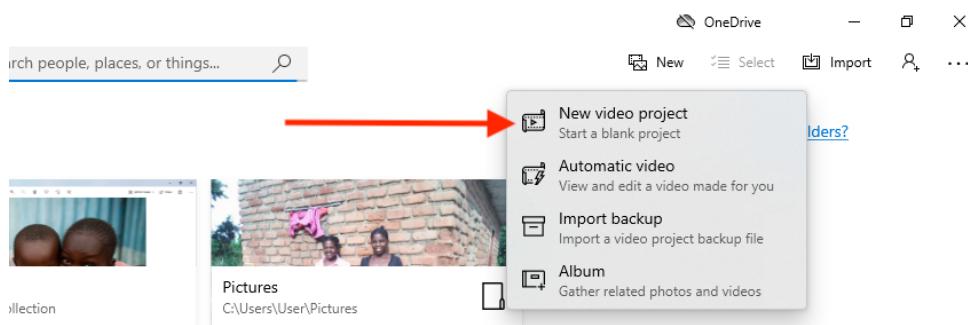

1. On your PC, select the **Start button** and then select **Photos** to open the Photos app.

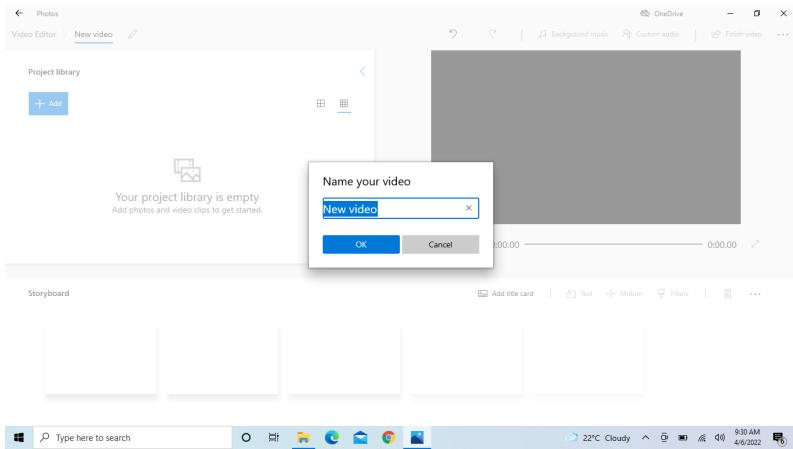

2. If you are already in the Photos app, **click the blue left arrow** in the upper left until it disappears.

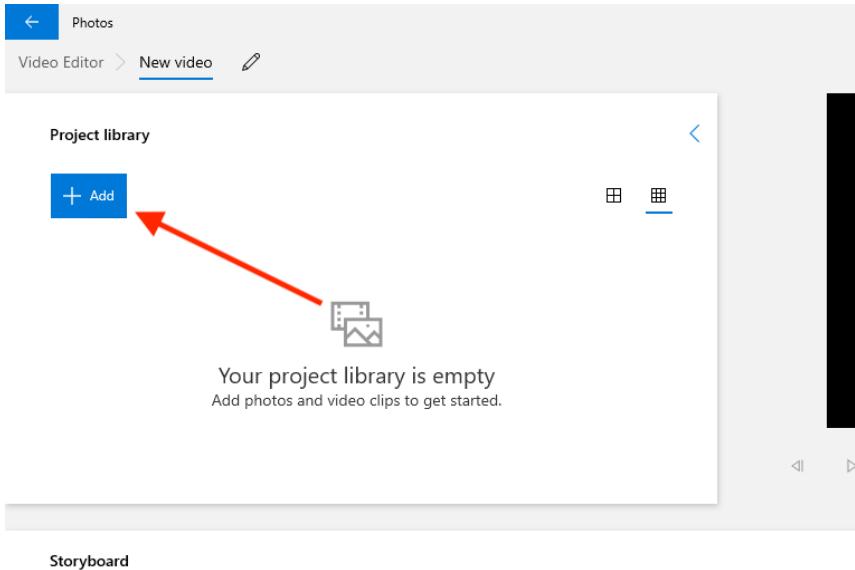

3. In the top right select **New > New video project**.

4. Give a **name** to your video and select **OK**.

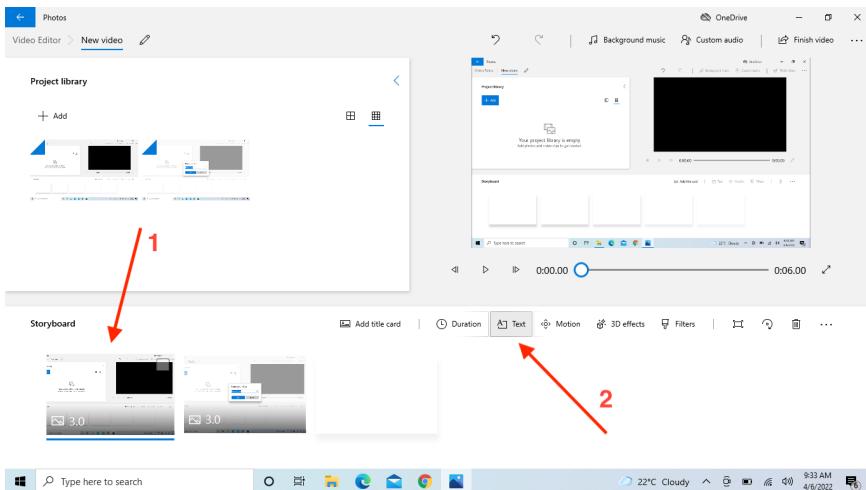

5. Select the blue **+Add** button then select **From my collection**.

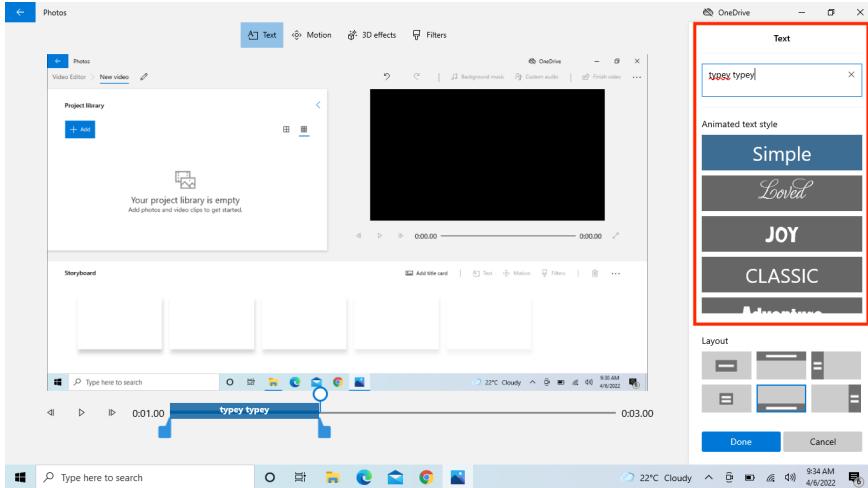

6. Select all the photos you wish to use then click **Add**. You are now ready to start creating your video.

Adding Subtitles

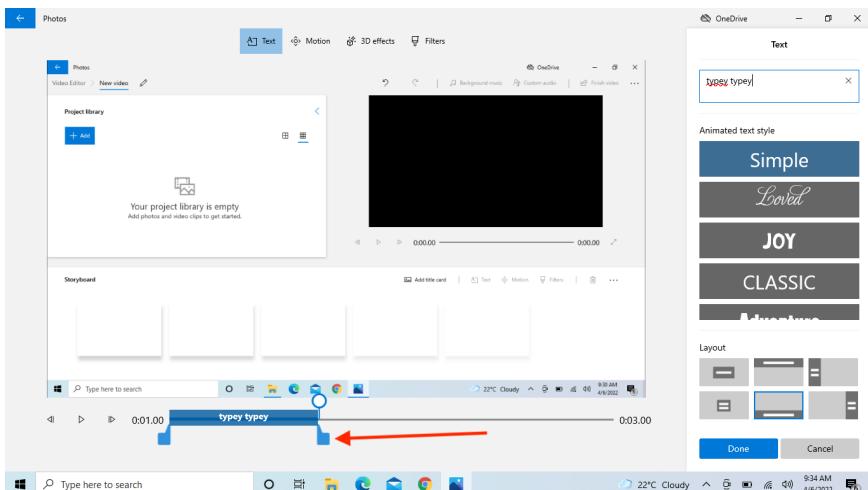

1. Under the **Storyboard** section, click on the video clip you wish to add subtitles then select **Text**.

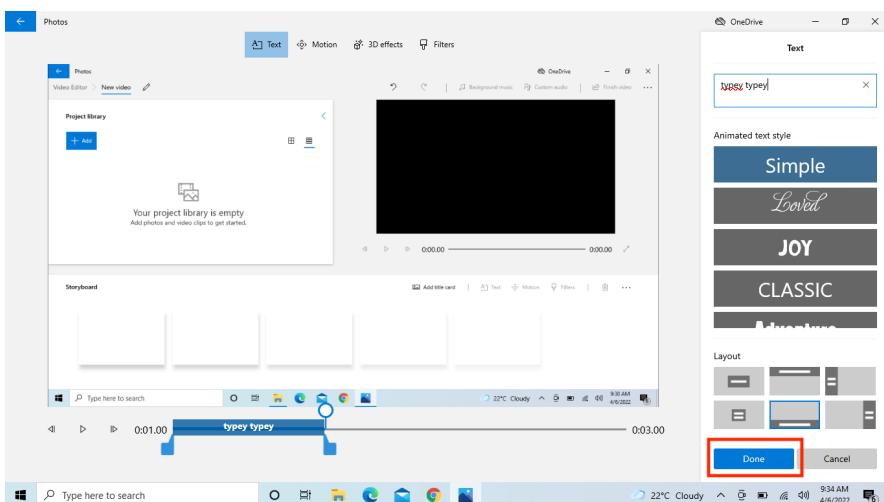

2. Type your text in the box and choose an Animated text style.

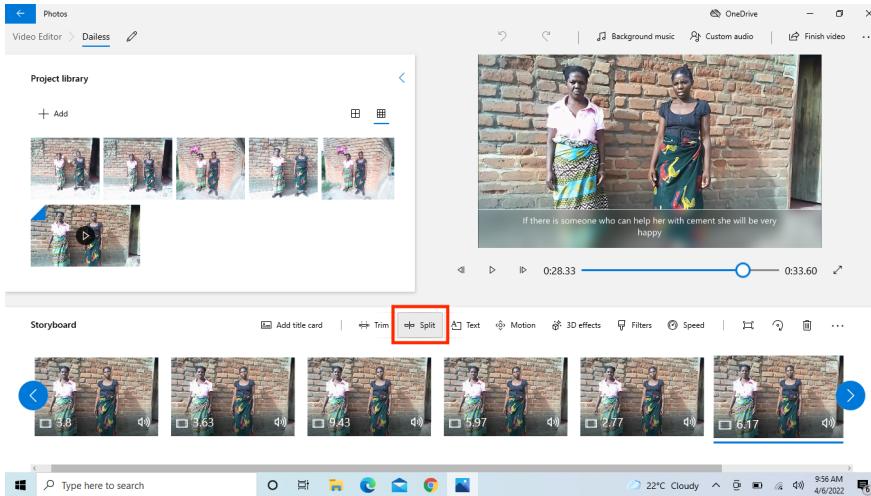

3. Use the **blue squares** on the bottom to choose the start and end points for your text.

4. Select **Done**.

5. Now select the **Split** option.

6. Move the **blue circle** to the location where you want split the video. This should be the point just after the end of the text you write in step 2.

7. Select **Done**.

8. Repeat from **Step 1** until all subtitles are added.

Editing an existing video

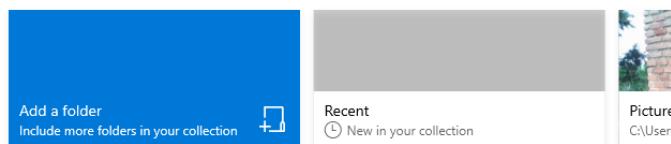

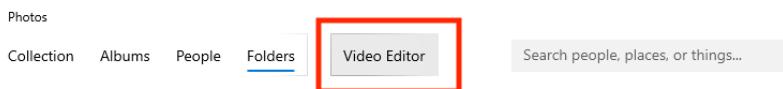

1. On your PC, select the **Start button** and then select **Photos** to open the Photos app.

2. If you are already in the Photos app, **click the blue left arrow** in the upper left until it disappears.

3. On the top near the left, select **Video Editor**.

4. **Double click** on the video you wish to edit.
